

Aflac Incorporated

Accelerates Vulnerability Management

Goals

- Faster zero-day response removes risk
- Increase visibility into security threats
- Reduce reporting burden
- Identify hidden threats

Aflac Incorporated, Atlanta Georgia

Industry: Healthcare Insurance Provider

Services: Aflac provides protection to more than 50 million people through its subsidiaries in Japan and the U.S.

Employees: 11,700+

Solution: Qualys VMDR

SUCCESS FACTORS

Deployed to 50,000
IT endpoints across its global environment

Slashed reporting tasks
from weeks to minutes

24/7 infrastructure view
enabled direct access to real-time data for improved efficiency

High scalability
for future expansion

55%

Reduced
critical and high-severity vulnerabilities

You can't fix issues if you don't know they're there.
So, we were very pleased that Qualys VMDR increased our visibility of security threats. VMDR makes it so easy to get the data we need to protect our business.

Brian Penn

Security Posture Manager, Aflac Incorporated

Why Qualys?

- Integrated apps for asset identification and management, vulnerability management, PCI compliance, threat detection and prioritization and response.
- Ability to scans millions of assets for vulnerabilities each week, meeting regulatory requirements.
- Delivers fine-grained data to monitor remediation work
